Matt and Jan,

If there is a local supplier that can provide what we need that's great - the specific manufacturer is not important. we are likely to need a couple / three bids as costs are just high enough.

One area that I forgot about is the staging / storage area for the waste rock at Gladstone. We need to do something to prevent erosion even if some may go to gravel. (need some more data on that.) The upper area where it was accessed off the road needs to be restored and amended and seeded.

At this time, based on the channel work completed - it does not appear that coir logs are needed, unless Jan is recommending it somewhere.

Jan - in the plan I don't see any spec on the compost. Is it in there? Was there a compost preference for one of those proposed by the vendors (Durango Nursery, Wagner, etc)? I saw the 3yr double net coconut blanket spec – any preference on what vendors provided? Also, coir logs are listed as a “maybe.” Any input on amount to order would be appreciated.

Thanks

Matt

Subject: Draft Reclamation Plan

Steve,

I thought I'd sent this Friday night but it doesn't show in my "sent" folder. I even remember writing the e-mail. Oh, well, so much for electronic communication.

Please see the attached DRAFT Reclamation Plan for the Gold King Treatment/Stabilization project. I've attached both the pdf version that has all tables and graphs and the Word document for your convenience. This document is submitted for your review and comment. Please contact me, Elliott, or Dave if you have questions or comments.

Jan
